

“Each and every Cavalier camper trailer is constructed in accordance with Cavalier’s well renowned and exacting standards - the likes of which are the envy of other manufacturers and have seen Cavalier Camper-Trailers at the forefront of the camper trailer industry since 1983.”

EXPERIENCE COUNTS

When John Welsh, the owner of Cavalier Camper-Trailers, started making camper trailers way back in 1983 he was one of the first in Australia. John still owns Cavalier and he would never have thought that, more than 25 years after he started, he would still be as passionate about producing the best value for money camper trailer available. I'm sure you'll agree that no amount of money can buy this sort of experience.

Over the years many other brands of camper trailers have come and gone, but Cavalier has always remained a constant in the camper trailer industry.

Many of Cavalier's customers are now classed as friends, who have come to value Cavalier's impressive after sales service and the fact that they can rely on Cavalier to be around if they might ever need additions or repairs to their camper trailer.

Cavalier has always made a point of focusing solely on making and selling camper trailers, it's not just a sideline for them, so they aren't distracted by selling cars, caravans or the like - camper trailers have got their full attention.

PROVEN SAFETY

Of course, the safety of you and your family should be your number one priority and Cavalier is justifiably proud of its proven track record of strength, durability and safety.

Without a shadow of a doubt, the results of Cavalier's 25 years experience in making camper trailers are immediately obvious.

Cavalier's strict compliance with all Australian Standards (and it's a big worry that not everyone does this) has resulted in an enviable safety record for Cavalier, meaning you can truly relax and enjoy

your camper trailer in comfort and with true peace of mind. This is how it's meant to be, as there's nothing worse than a breakdown to spoil a well deserved holiday and get your nerves jangling!

EXTENDED GUARANTEE

Manufacturing their camper trailers solely in Australia, Cavalier use the best Australian made components available to them.

Cavalier is extremely proud of the fact that its campers are NOT made in Chinese sweatshops, but by happy Australian tradespeople who love their jobs and are passionate about the quality of the camper trailers they make. Cavalier Camper-Trailers is dedicated to providing jobs for Australian workers and supporting Australian industries. This is a refreshing and increasingly rare quality to find these days - surprisingly, even in the camper trailer industry.

The outstanding quality of the materials and superior manufacturing techniques employed by Cavalier allow them to confidently provide you with a two year warranty. You can safely rely on the fact that they will go out of their way to make things right for you in the unlikely event that you have to make a warranty claim.

AUSTRALIAN CANVAS IS THE RIGHT CHOICE

Cavalier only uses Australian made "Dynaproofed" canvas from another proudly Australian company, Wax Converters.

The "Dynaproofed" formulation used by Cavalier contains UV stabilisers, rot and mildew inhibitors, waterproofing waxes, premium colour pigments and high performance acrylic binders. This formulation is applied via a full immersion process which allows for the treatment to be absorbed right into the fibres of the canvas,

which also provides excellent breathability and lowers the chance of condensation on the canvas.

Cheaper (usually imported) canvas might only have waterproofing chemicals painted onto it - usually only to one side of the fabric and not fully immersed. This not only results in uncomfortable condensation problems for you, but the fabric may only last you short term - in some reported cases it's been as little as six months - before the Australian UV conditions destroy the fabric's waterproofness and strength, making the fabric prone to leaking and ripping (anyone for more holiday stress?)

Always making use of the latest technology, the patterns for Cavalier's canvas components are all computer generated and the canvas is computer cut for precision measurement. The seams are all reinforced and double stitched with heavy duty, core-spun thread (this is very important to avoid leaks). The zippers are heavy duty YKK.

POWDER COATING - THE CHOICE OF EXPERTS

Cavalier Camper-Trailers powder coat their trailers - and for very good reasons.

Powder coating offers dramatic advantages over liquid paint and has become the preferred finish for most metal surfaces. It has been proven to possess significant durability and resistance to rust, UV rays, abrasion, corrosion, chipping, scratching and chemicals - far superior to an ordinary painted finish. A powder coated surface stays bright with less fading and thick, even coatings are easily achieved without drips or runs.

Also needing less cleaning and maintenance than a painted one, a powder coated trailer makes your job of looking after it so easy.

To further improve the resilience of the final finish, Cavalier uses a high zinc containing primer which provides extra protection for steel from corrosion.

These days it's common for farm machinery, motorbikes and even exterior car parts to be powder coated, purely because it has so many benefits over paint.

Another significant advantage of powder coating - and one not to be overlooked - is that the powder coating process is very environmentally friendly as, unlike liquid paint, it involves no solvents and therefore emits no pollutants into the atmosphere. Also, the minimal amount of waste which might be produced is non-toxic - and we all like to do our bit for the environment.

In short, powder coating will provide you with a more attractive, stronger and longer lasting finish on your trailer.

EASIER FOR YOU TO USE

Cavalier camper trailers are light, low, easy to tow and setting up is a breeze. Do you want to waste your valuable holiday time setting up your camper? No need to - with a Cavalier camper trailer it's so easy for you to get great results with no fuss.

Cavalier camper trailers are light enough in fact, that they can be very easily towed by most cars - and low enough not to block the driver's rear vision. You'll soon find yourself forgetting that you are towing anything at all and there's hardly a dent in your petrol consumption.

VARIETY IS THE SPICE OF LIFE

By now you could be excused for thinking "that's all very well, but that probably means they're boring."

Well, think again. With a variety of models (on-road, rough-road and off-road), a choice of sizes, colours and a host of optional extras - there's sure to be a Cavalier camper trailer that's just right for you.

Customising is also no problem at all - Cavalier is all too happy to do whatever it takes to make your perfect camper.

SAVE YOUR TIME AND MONEY

A Cavalier camper trailer will help you avoid costly and annoying repairs by incorporating the very best of materials, design standards and manufacturing techniques.

Yes, it is possible to buy a cheaper camper trailer. You may think that you're saving yourself some dollars on the purchase price, but you could end up spending more in the long run.

How many times have we all heard the saying "you get what you pay for" - well in this case it's actually true. At one time or another we've all bought cheap copy-cat items because they look all right, only to have to throw them out when they don't last, or they don't ever work properly at all! While this doesn't matter much if you have only paid \$2 for something, if you're going to spend several thousand dollars on a camper trailer, you actually need it to be safe to use, not fall apart on you, and most of all, you'd like to be able to use it more than once or twice.

After all, a camper trailer is a long term proposition and it's the reason why you can't go past a Cavalier camper trailer for sensational quality and value for money.

THIS IS A CAMPER TRAILER YOU WILL EASILY FALL IN LOVE WITH ... just like thousands of Australians have before you!
